October 2021

"Innovator of the  
Year" award at the  
Central Asia Nobel  
Fest

October 2021

The 1st university  
exhibition on  
technology and  
innovation

September 2021 -  
May 2022

Semester-long  
courses from Nobel  
Prize laureates for  
the universities of  
Central Asia

# THIRD NOBEL FEST "THE FUTURE IS NOW"

## IT IS HARD TO BELIEVE,

but we are already living in the world of the future. Technologies are developing so fast that a person from the middle of the 20th century would have thought that our modern world is nothing more than an incarnation, risen from the pages of some futuristic book of fiction.

**GREEN REALITY**

**CENTURY OF  
INNOVATION**

**SKILLS FOR THE  
NEW ERA**

**ECONOMY FOR  
PEOPLE**

## HOW DO WE RACE AFTER EVER-CHANGING TRENDS?

The third Central Asia Nobel Fest «The Future is NOW!» is dedicated to these transformations that touch upon every sphere - from economy and energy to communication technologies and medicine.

# KEY TRACKS AND FEATURED TOPICS

## GREEN REALITY

This track's sessions will be dedicated to discussing important questions like development of "green" startups, zero-emission cities, breakthroughs and innovative approaches in the world of Green Tech, and also civil society initiatives that aim to reduce the impact of climate change on the environment and look for new paths to sustainable development.

## CENTURY OF INNOVATION

We are standing only at the beginning of the technological startups era, expecting the rapid emergence of many commercial companies that look for new solutions and innovations. How to become part of this exciting process? How is AI influencing our daily life? Will people be able to live until 200 years old? And when are we going to establish the first colony on Mars?

## SKILLS FOR THE NEW ERA

This track focuses not on just discussions, but on practical workshops and master-classes on financial literacy and starting your own business, the art of written communication, innovative approaches to learning and education, soft skills, and many other competencies that are relevant to the world of today.

## ECONOMY FOR PEOPLE

International and regional experts will discuss how to create an economy of equal opportunities and transition to the solidarity economy model, enabling the development of innovative solutions that prioritize the well-being of people and the planet to ensure sustainable growth.
